

FOR IMMEDIATE RELEASE

**COMMENDO SOFTWARE JOINS THE
GIRVAN INSTITUTE OF TECHNOLOGY AFFILIATE NETWORK**

Commendo Joins an Ecosystem that Enables US Government Agencies and Fortune 1000 Companies to Source Innovation from Technology Driven Ventures

FREMONT, CA – July 28, 2004 - Commendo Software, Inc. a leading provider of information virtualization solutions, has entered into an enterprise affiliate agreement with the Girvan Institute of Technology, an organization chartered to foster research, cutting edge technology development and technology commercialization across the world.

“This partnership is a major step forward for Commendo as we penetrate the market with our Commendo Virtual Foundation™ products for Business Intelligence and Portals,” said Reynaldo Gil, Chairman and CEO of Commendo Software. “Girvan’s advanced technology expertise combined with their deep knowledge of the aerospace and defense industries form the basis for a strong partnership. Commendo’s patent-pending products are designed to meet the growing demand for efficient processing power that supports information browsing, searching and reporting applications in the private sector and government.”

“Commendo was selected for this partnership due to their innovative technology, experienced team and proven success with leading global companies,” said Gopal Patwardhan, Vice President and COO of the Girvan Institute of Technology. “We are pleased to be working with Commendo as they build and grow their business.”

About Commendo Software, Inc.

Commendo Software helps companies get the most from their information infrastructure. Our solutions enable customers to increase the efficiency, protection and performance of existing information technology. Commendo utilizes a unique, patent-pending Commendo MicroVirtual™ technology foundation that virtualizes existing data center resources associated with query-based search, navigation and reporting and dynamically relocates the complex processing, storage and network power to the enterprise user. As a result, Commendo solutions achieve significant infrastructure savings by reducing labor, storage, server and network costs while dramatically improving scalability and global user experience. Commendo Software is a privately held company located in Fremont, California, USA.

About Girvan Institute of Technology

The Girvan Institute of Technology was established in 2002 as a non-profit, public benefit corporation to accelerate the development and application of cutting edge technologies into useful products and services. The institute leverages the technological output of research & development enterprises in the private and public sectors to promote collaborative development of technology, transmission and dissemination of intellectual assets, and the development of commercial enterprises across the globe.

Girvan's affiliates and partners include research labs in the United States and abroad, Fortune 1000 companies, small and medium sized hi-tech companies and a number of private equity and venture capital firms. Today, Girvan supports the research programs of DARPA, the US Air Force, the US Department of Energy, NASA Ames (UAV Application Center, Collaborative R&D), as well as a number of research and academic organizations around the world.
